WE KEEP MOSQUITOES AND TICKS AWAY IN 2020!

In time for each new season and thereby also for each new catalogue my ambition is to bring something new and interesting up as a topic. Four years ago the Pinewood brand celebrated 20 years in business, of course something we had to write about then. The following year I wrote about how our own factory in China had been noticed for our unflinching work to produce our products both environmentally and socially correct to the benefit of our workers as well as consumers across the world. The year after that we wrote about our digital investments into our website and B2B platform. So what happens in 2020.....?

For 2020 I absolutely have to mention our innovative Pinewood Insect-Stop collection which we have been developing during that last year! We are launching a collection of garments that in an eco-friendly way repels mosquitoes, ticks, flies and many other summer bugs

and insects..... Sounds too good to be true! I was initially a bit sceptical myself but have now learned that the product actually does work! Quickly bio-degradable, safe at skin contact as well as safe for animals and organisms on both land and in the seas. The active substance affects the sense of balance and orientation of insects and can be detected from a distance which makes most insects to prefer not to land on the treated fabric or when they do they will be more or less disorientated and in their confusion, in most cases, not bite.

The treatment is harmless and safe for all, inclusive of children and pregnant women. Very important to know is that our Pinewood Insect-Stop does not kill insects and bugs! Instead it creates an atmosphere around the treated fabrics, a zone of discomfort, where the insects prefer to not come in contact with the garment.

Producers have during many years tried to find a technique where the active substance IR3535®, inspired by naturally existing beta-amino acids, is securely integrated into fabrics long term without being easily washed out. A way has now been developed and therefore now it is possible to add this fantastic feature into fabrics and garments instead of into repellent body sprays which are for short term purposes only. IR3535® has with great success been used in insect repellent bodylotions and sprays during the last 30 years. We have now,

after a lengthy development process alongside our supplier, found a satisfying bio-chemical solution that excellently blends with our textile fabrics. For us it was very important to not use any substances containing Permethrin or DEET as we in our opinion, do not find these safe for people nor our environment. With IR3535® we feel safe and secure!

Now you have the possibility to not have to bother much about bugs and insects and instead enjoy your outdoor activity without buzzing interruptions! If that is hiking up the trail, camping or fishing by the lake, bird watching, on a walk in the forest or elsewhere.... It does not really matter where you are, the Pinewood Insect-Stop products will help you keep mosquitoes and ticks away! Summer outdoor life saved?!

Do not forget to "like" us on our Pinewood Facebook and Instagram accounts to keep yourself updated on that is happening in the Pinewood world.

With these words I wish you a great mosquito and tick-free summer, I keep my fingers crossed for a warm summer where I can enjoy both forest walks and that great everyday refreshing swim in the nearby lake. Take care and we will see each other outdoors!

Best outdoor greetings
Rainer Rüssel
CEO, Pinewood AB

Trade with purpose

Member of amfori, the leading global business association for open and sustainable trade.
For more information visit www.amfori.org

CONCEPT

To develop and supply active outdoor clothing in a combination of high function, design and quality to less money making Pinewood® market leaders in our segment.

CUSTOMERS

Consumers in all ages that enjoy being outdoors despite the weather. Consumers who wish to spend less money but still request high function, comfort, design and quality.

VISION

To create an internationally recognized outdoor brand. To inspire more people to enjoy nature and to spend more days outdoors.

WE PROMISE – PRODUCTION

Pinewood® actively works with sustainability issues and social responsibility. We have joined the amfori (previous FTA - Foreign Trade Association) and work to implement the BSCI (Business Social Compliance Initiative) Code of Conducts to strengthen the workers rights in our production facilities, to give better working conditions, to offer fair wages, to eliminate child labor and so on. We do this as we care about those who produce our products! We also support the 10 principles of the United Nations Global Compact.

WE PROMISE – ENVIRONMENTAL

We actively work to meet the REACH standards and to use as many components which are Oeko-Tex 100® or in other ways environmentally certified as possible in our products. We shall always choose the more environmental better option when we are sourcing new materials for our products and this without compromising the quality and function of our products.

ENVIRONMENTAL RESPONSIBILITY

We work to contribute to a better world, even if we, as many companies in the world, utilize the earth's resources in some way. We are a small part of the world's clothing production companies, but we consider that the more we actually can do for society and the environment is something which contributes to a better world and future for us all.

FSC® FOR PEOPLE WHO CARE ABOUT THE FOREST

GIGI SAHLSTRAND

CUCKOO ABOUT BIRDS

She abandoned the hassle and stress of the IT rat race to become Sweden's first professional female birdwatcher. "The best lifestyle choice I ever made," says Gigi Sahlstrand.

TEXT: ULF BERTILSSON • PHOTO: GIGI SAHLSTRAND/PRIVAT & GÖRAN FORSBERG

Gigi and Bosse – a well-known couple in birdwatching circles.

When Gigi Sahlstrand began birdwatching in earnest in the middle of the 90s, many people wondered what was wrong with her. What? A female birdwatcher?

At the time, birdwatching was essentially a hobby for men. Nerdy men who shut themselves away in ornithological societies and sneered at people who were unable to tell a great tit from a blue tit.

From time to time, Gigi got irritated by this kind of male know-it-all behaviour. That's how she got involved and helped start *Rapphönan* (the partridge), a nationwide network for female birdwatchers.

"Rapphönan has played a part in there being almost as many women as men who enjoy

being outdoors watching birds. No one need be embarrassed any more if they don't know every species of by heart," says Gigi.

Leaving the stress behind

Many of us who are caught up in the rat race also dream about something much better. A slower pace and a more natural life where there's time and space for reflection, contemplation and inspiration. For most people, it remains merely a dream, but for Gigi, it became the new reality.

She had a job in the IT industry that was picking up speed at an ever faster pace, without giving her a chance to catch her breath. What's more, she had to endure endless tailbacks and exhaust fumes on her commute to

and from home on Ekerö and her job in central Stockholm.

"Okay, so I'm earning a lot of money... but I'm also stressing myself to the point of cracking up. Is it really worth doing this, year in year out?"

Maybe she could start a company that combined work with a hobby, perhaps with birdwatching as the common denominator? She took a thorough look at her finances before deciding "It's now or never!"

So she took a deep breath and a giant leap in the dark... and made a soft landing as self-employed in a job that's more of a spiritual lifestyle than mere wage-earning drudgery.

"Now I'm doing what I love and at a pace I choose. Daring to drop out of the rat race was the best lifestyle choice I ever made!"

“Essentially, fellowship with others is just as important as the birds.”

These days, Gigi runs Fågelguidning AB together with her live-in partner, Bo Thoor. The company guides people with an interest in birds – mainly in Stockholm and Kalmar counties – and arranges lectures, courses, events and trips in Sweden and abroad.

Birdwatching is all the rage

Gigi is a celebrity in her field and has sat on various morning TV show sofas as an expert on birds. A few years ago she was the judge in the SVT reality series, *Det stora fågeläventyret* (the great bird adventure).

“What a boom that series was! The last vestiges of nerdiness disappeared and birdwatching became all the rage. One mother called and thanked us as she’d finally found a programme she could watch together with her two teenage children.”

Gigi and Bosse love to be out together in the great outdoors, in the mountains and plains, and by lakes and the sea. Birdwatching helps them get out in every kind of weather. All year-round. In Sweden and abroad.

“The saying ‘there’s no bad weather only bad clothing,’ could not be more true.”

Socializing and birds

As a birdwatcher, Gigi has both a competitive and a social side. It was the 300-club that initially sparked Gigi’s interest in birdwatching and getting outdoors to tick off species after species when the rare-bird alarm went off in her mobile app.

Such as Bosse’s and her latest entry – a Wilson’s Snipe that had gone astray all the way from the continent of North America to northern Uppland in Sweden. Gigi has no fewer than 397 species entries for Sweden. We should bear in mind that there are ‘only’ 250 breeding species in Sweden and around 50 regular passage migrant species.

The social side of birdwatching is all about the pleasant feeling we get when we share an interest with like-minded people. Lighting a camp-fire, grilling sausages and having a chat on the edge of a clearing or watching quietly from a bird tower imparts a sense of belonging and fellowship that Gigi and Bosse would like as many people as possible to enjoy.

“Essentially, fellowship with others is just as important as the birds. Coffee, tea, a snack and a chat and experiencing nature together. Life doesn’t get any better than that.”

Tip! Read more about Gigi Sahlstrand’s and Bo Thoor’s Fågelguidning AB services at www.fagelguidning.se

Gigi Sahlstrand almost always has her binoculars trained on birds. At sea, in the woods, in the mountains in Bosnia-Herzegovina...

CAMOUFLAGE NOT IMPORTANT

Gigi Sahlstrand and Bo Thor are Pinewood ambassadors and wear the company’s clothing, summer and winter alike.

A lot of people find it difficult to choose birdwatching clothes. What affects birds in the field? Bear in mind that birds do not see colours the way we do, so don’t worry too much about camouflage.

“But let’s be clear, it’s no good wearing a white jacket in the middle of the jungle,” laughs Gigi.

She and Bosse are great fans of the Pinewood Outdoor Collection, both the colourful shirts, and their jackets and pants.

“The clothes are comfortable, warm and stylish. And their being windproof is a big bonus for us birdwatchers.”

HIKING/MEN'S JACKETS

Water column:
>18.000 mm

Respiration:
22.000 g/m²/24h
(ASTM: 8.000 g/m²/24h)

JACKET PINEWOOD® TELLUZ 5213

An extremely, wind- and waterproof, stretchy lightweight 3-layer jacket. High collar with well thought out ventilation holes. Fixed, adjustable hood. Taped seams. It's a great jacket for an active outdoor activity or everyday use. This is a jacket that can handle an exceptional rainy and windy day. 2-WAY STRETCH

UV-PROTECTION

TOMMY LÖNNEBACKE

FROM FULUFJÄLLET NATIONAL PARK

When the warm summer day in the mountains starts giving way to evening, the winds die down, the lake is as still as a mirror, and the char start to appear at the surface all over. It's time to get the BBQ going, and brew some coffee over the crackling fire.

Just as evening falls, the mosquitoes make their approach and join you. They've been waiting, biding their time, in the mountain birches during the warmth of the day. If you're not prepared for them, this can be a real pain for many people.

Usually, we plaster ourselves in all sorts of different chemicals, directly on the skin. But the need for this can really be reduced with Pinewood's new mosquito clothing. During the summer, I tested both a shirt and trousers that have been impregnated with mosquito repellent. I have tested impregnated clothes before, but they've always had a strong smell, and these clothes don't.

The shirt I've been using is camo green and the material is sturdy. It's got double breast pockets for tippet or other small bits and pieces. One function I like is that the sleeves can be folded up and buttoned just above the elbow. I tend to roll the sleeves up during the day, and then roll them down again to protect my arms when the mosquito invasion begins.

The trousers are khaki coloured and have removable legs so they can be worn as shorts during the warmer part of the day. The elastic waistband means it's easy to find the right size and they are nice and comfy. The trousers have double front pockets and leg pockets, and a back pocket. Around the ankle, a grip fastener cord allows you to tighten the bottom and keep out the leeches. The light coloured trousers also work nicely for summer adventures of the more urban variety.

So do they work? To me it feels like the mosquitoes do keep away. They are still around, but they don't land on me, especially not in the quantities that they land on my friends sat around the fire. So now you can experience far less buzzing and bites from the mosquitoes, and look really good at the same time. If the mozzies are real-

ly bad, I just add a proper buff and a cap. That way, I only need to put repellent on the back of my hands and a bit on my face. I've also washed the garments and noticed no deterioration in the effect.

This type of impregnated garment is perfect for those of you who usually look like you've contracted the measles after an evening outdoors. I spend the entire mosquito season up at Fulufjället, and will definitely use both the shirt and trousers on next summer's buzzing summer evenings.

Tommy Lönnebacke
Fulufjällets Nationalparks Camp

NEW

FANTASTIC OUTDOOR CLOTHING! ENJOY YOUR DAYS OUTDOORS!

The Pinewood® Insect-Stop technology revolutionises the way in protecting outdoor clothing against insects. The technology creates a long-lasting and effective shield/atmosphere around the textile fibres which causes most insects to avoid landing on the fabric, an added value to the already high functional outdoor garments in the collection. The active repellent substance IR3535® has during more than 30 years been used in insect repellent sprays and lotions, only now with new advanced technology, it finally can with long-lasting effect be integrated into textiles!

- Outdoor clothing suitable for warm climate conditions where quality, high level function and focus on the outdoor adventure is of utmost importance
- High level clothing protection against most species mosquitoes, ticks, flies and other insects
- UV-protection
- 2 or 4-way stretch fabrics for extra comfort and fit
- Quick-drying effect
- Multiple pockets
- Light weight and packable
- Zipper closures for extra protection of valuables
- IR3535® (Ethyl butylacetylaminopropionate) by German Merck KGaA is classified as a Biocide, non-toxic to aquatic organisms such as fish and algae, does not kill insects and does not interfere with the eco-system nor accumulate in the environment. Acts on insects olfactory sensory system causing insect disorientation, classified in the safe category U for humans including children and pregnant women, approved by EPA (USA), ECHA (EU) and WHO.

JANNE'S FISHING TIPS

SPRING & SUMMER ANGLING CALENDAR

Angling is Jan Olsson's passion and livelihood. He's been running his own digital publishing company with a total focus on angling since 2011. Here he not only shares the major spring and summer fishing trends, but also provides a few tips to enrich your angling experience.

TEXT: ULF BERTILSSON • PHOTO: JO STENERSEN & JANNE OLSSON

2020 – THE YEAR OF THE PERCH

- I hereby proclaim 2020 to be *The Year of the Perch*. I've long been surprised about the unusually weak interest in perch fishing, considering what a great fighter the fish is once it's hooked. But happily, in recent years more and more people have discovered the joys of getting out and fishing for perch. And the plans in hand for Sweden's first perch fishing championship further emphasize the trend.
- Perch are widespread throughout the continent. Perch weighing up to three kilos are not unusual in southern and central Europe. I've personally caught several two-kilo specimens, borderline three, in the teeming canal systems of the Netherlands. Here in the Nordics, perch seldom exceed two kilos, mainly because of the colder climate and less available food.
- Perch provide satisfying, rewarding summer time fishing. They are energetic biters even in warm waters when most other species are listless and disinterested. Rubber lures are my favourite perch bait. In general, the following advice applies: dark lures in murky waters, pale lures in clear waters.

THE INTERNET – THE ANGLER'S BEST FRIEND

- Many fishing fans enjoy discovering new locations and new fishing waters. The drawback to being out in unknown territory is the time it takes before you find the right stretch of water. With this in mind, I'd like to put in a word for all the capable local fishing guides who offer their services on the internet. Let the fishing guide's experience become your knowledge.
- In fact, the internet is among an angler's best friends. It's not only the place to look for fishing guides, but also for buying fishing licenses, getting tips and advice in various angling forums, chatting with like-minded anglers and sharing your own experiences. There are a great many good fishing groups on Facebook, and more than likely for the type of fishing you most like to do.
- Well functioning tackle is naturally the be-all and end-all of successful fishing. For example, a fishing vest is a practical garment with many pockets and storage options to make sure you keep all your bits and pieces in order. Avoiding the need to rummage for knives, pliers, whet stone, traces and so forth is an excellent way to stay in good spirits. Good luck with your fishing this spring and summer!

After a lot of ifs and buts, Björne the homeless boxer finally moved into a new forever home in Luleå.

IT'S A DOG'S LIFE

Those sorrowful, pleading despondent eyes... It's heartbreaking to see an ill-treated animal. Come with us to the Hundstallet dog shelter in Bromma outside Stockholm, where ill-treated and homeless dogs get the chance of a new, better life.

TEXT: ULF BERTILSSON • PHOTO: HUNDSTALLET/HANNEKE BONTHUIS

Maybe you saw the series *Bagge's Homeless Hounds* on TV4? You know, the show where Anders Bagge spotlighted one tragic dog plight after another, but where the stories almost always had a happy ending thanks to the enthusiasts at the Hundstallet shelter.

The boxer Björne is one among all the dogs that were given a new start in life. He was found running free in a park in Stockholm when he was around one-year-old. As no owner got in touch, the dog was handed to Hundstallet.

He soon found a new home, but his owner fell ill and Björne returned. Another new home emerged, but it was soon apparent that Björne was unable to live with or even meet other dogs. So, back to Hundstallet – again.

The shelter realized that the boxer needed a home with people who would accept him

exactly the way he is with all his peculiarities. An enlightened, stress-free home with no other dogs or cats, and with children able to handle a leaping, bounding 36 kg boxer male that sometimes snapped at whoever was holding the leash.

Finding a home that met all these requirements proved to be less than easy, and Björne remained at the shelter for more than a year, but in the end they were contacted by a couple from Luleå who met all their wishes and requirements. So, now Björne has found his new home where he's loved for being just the dog he is.

A driving force

For many years, Anna Beijer has been a driving force at the Hundstallet shelter in Åkeshov, where the operation moved in 2005. The facility

was purpose built from the ground up to meet all the functional requirements of a shelter that would house around 50 dogs and 20 or more dog handlers.

"We have individual indoor kennels with windows, dog beds and dog flaps, which are open during the day, leading to the courtyard. What's more, every dog gets four walks a day with our dog handlers. I can confidently say that we take care of dogs and rehabilitate them in the best possible way," says Anna.

Taking care of many dogs

Hundstallet takes care of around 500 dogs per year. Most of them come from the police and the County Council, who pass them to Hundstallet pending investigations. Around 100 are handed in by private dog owners who, for one reason or another, are unable to keep their dogs.

GREAT CLOTHES FOR EVERY WEATHER

The Hundstallet shelter in Bromma is close to Åkeshovs Manor House and the Judarskogen forest. The extensive nature reserve is where they exercise the dogs several times a day, regardless of the weather.

Naturally, the 20 dog handlers need durable, all-weather clothing when they're out and about with the dogs in the wind and rain. And excellent clothing is what they wear – from Pinewood.

“Pinewood’s dog sport collection is outstanding and functional. The garments are durable and comfortable, easy to wash and long-lasting,” is how Hundstallet’s Anna Beijer assesses them.

Anna Beijer at the Hundstallet shelter in Åkeshov together with Atlas.

“You have to think twice before you get a dog, and make sure you’re prepared to provide it with the stimulus it needs if it is to thrive.”

“When I first started work at the shelter and saw the way people mistreat their dogs, I almost lost faith in humanity. Everyone who works here has no choice but to change their approach in order to face coming to work,” says Anna.

“Now I only look to the future, making sure that any dog in my charge will enjoy the best of lives from here on in!”

Think twice before getting a dog

According to Anna, one of the main reason so many dogs are ill treated today is that it's so easy to buy one.

In the past, you had to visit a kennel or a dog breeder and prove that you were a suitable dog owner for the breed in question. These days, it only takes a few clicks to buy a dog on the internet. “Oh, what a cute little puppy. We simply must buy it!”

And that’s how an Arctic dog like a Siberian Husky ends up in a five-kid family in inner-city surroundings where no one has time for the dog and its need for constant exercise.

“A Siberian husky is not a cute little lap dog, but a performance-oriented sled dog. A multi-sport athlete that demands a huge amount of exercise out in the wild if it is to thrive and enjoy life.

But if its owners are both couch potatoes, things will just not work out.

“You simply have to think twice before you get a dog, and make sure you’re prepared to provide it with the stimulus it needs if it is to thrive.”

8 000

Svenska Hundskyddsforeningen (Swedish Dog Protection Society) was formed in 1908 and has almost 8,000 members. The non-profit organization runs Hundstallet, which rehabilitates homeless and ill-treated dogs and re-homes them with new owners.

Hundstallet has two shelters, one in Bromma outside Stockholm and one in the vicinity of Staffanstorp in Skåne. The operation is financed mainly through donations from thousands of benefactors and fund-raising organisations.

PINEWOOD® SUSPENDERS WITH STRAPS 9198

Broad elasticated suspenders. The criss-cross at the back and the straps are made of genuine leather. 77% polyester, 23% elastodien. Available in Dark Green (103). One size

SUSPENDERS PINEWOOD® THOMAS 9598

Wide suspenders, the criss-cross at the back are made of genuine leather. Fastened with strong metal clips. 44% viscose, 39% polyester, 17% elastodien. Available in Green/Brown (115). One Size.

TREATMENT

PINEWOOD® WATER REPELLENT WAX 4600

By caring for your garment you will be able to use it for many years. Wax your TC-garment after washing, make it more water repellent and extending its life-span. Only use on Pinewood's TC material. Heat by ironing after treatment. The wax is made of natural beeswax and paraffin. A wax block weighs 90g and is enough for the waxing of approximately 8 garments.

PINETECH™ SUPER WATER-PROOFER SPRAY – AIR DRY 9693 SPRAY FOR CLOTHES/FABRICS

Adds extra water repellent properties and improves protection against dirt and oil stains. Easy to apply on selected parts using environmentally friendly spray pump. Recommended on waterproof, laminated and coated fabrics. The waterproofer does not affect the breathing ability of the membrane and can be used on all synthetic and natural fibres. Does not have to be heated. Water based. This product does not contain propellant or fluoro carbons and is environmentally friendly. 300 ml.

High water repellent properties – Easy to apply – ISO 14001 eco-certified – Recommended for Gore-Tex® (Gore-Tex® is a registered trade mark for W.L. Gore and Associates).

PINETECH™ SUPER WATERPROOFER SPRAY – PATENTED ABRASION RESISTANCE 9694

Spray for clothes/fabrics – Patented wear-resistance
Wear resistant extra water repellent impregnation that improves protection against dirt and oil stains. Easy to apply on selected and exposed parts using environmentally friendly spray pump. Recommended on waterproof, laminated and coated fabrics. The waterproofer does not affect the breathing ability of the membrane and can be used on all synthetic and natural fibres. After application the garment or fabric should be ironed or tumble-dried thereby activating the waterproofer and giving maximum and long-lasting effect. Water based. This product does not contain propellant or fluoro carbons and is environmentally friendly. 300 ml.

High water repellent and dirt resistant properties – Extra long-term resistance to wear
Easy to apply – ISO 14001 eco-certified – Recommended for Gore-Tex® (Gore-Tex® is a registered trade mark for W.L. Gore and Associates).

PINETECH™ WASH-IN-WATER PROOFER – MACHINE WASH 9692

In order to get an evenly spread waterproofing and dirt repellent in a garment or cloth a machine wash with this product is recommended. The waterproofer is manufactured using a new technology giving greater durability against wear. That means that the product lasts longer and remains active for a longer time than other products. The waterproofer does not affect the membrane's breathability and can be used on all synthetic and natural fibres. After application the garment or fabric should be ironed or tumble-dried thereby activating the waterproofer and giving maximum and long-lasting effect. Water based and environmentally friendly. 300 ml.

New improved technology – High resistance to wear – ISO 14001 eco-certified – Recommended for Gore-Tex® (Gore-Tex® is a registered trade mark for W.L. Gore and Associates).

PINETECH™ WASH-IN-CLEANER – WASHING AGENT FOR FUNCTIONAL GARMENTS 9698

The ordinary washing powders used in most households today are founded on outdated chemical technology. This technology does not cater for today's technical membranes and functional garments. These washing powders lower the positive characteristics of the membranes. Our Wash-in-cleaner is a fluid washing agent which is the result of modern technology and gives better results on modern functional garments and fabrics. It is also water based and environmentally friendly. The Wash-in-cleaner does not affect the membrane's breathability and can be used on all synthetic and natural fibres. 300 ml.

New improved technology – Maximum washing results – Anti-bacterial – ISO 14001 eco-certified – Recommended for Gore-Tex® (Gore-Tex is a registered trade mark for W.L. - Gore and Associates)
Neutral pH.

Aprox. 0.8 kg. Available in Brown (205). Sizes 37-47.

ACCESSORIES

GUPPY FRIEND WASHING BAG 1107

Help protect nature with Guppy Friend laundry bag, it prevents micro plastics from synthetic garments ending up in lakes and seas. Put 1-3 items in the bag and wash as usual. The micro plastics which loosen during the wash cycle remain on the inside of the bag instead of following the waste water into the main sewer. After washing, remove the microfibers from the bag and, if possible, leave for recycling or put in the household waste. In addition to protecting the environment, you also extend the life of your clothing as the bag helps the wear and tear of the garments during washing. One size.

GAITERS PINWOOD® ACTIVE 1102

Practical gaiters all year round use, to avoid e.g. dirt, stones or snow accessing shoe. Front opening with zipper and grip fastener. Equipped with stainless steel hook to be attached to the shoe and steel wire with strap to attach around the foot. Adjustable with strap to close tightly. Made in durable oxford to make the gaiters sturdy. Water repellent coating. 100% polyester. Length 36 cm. Available in Moss Green (135), Black (400). Sizes: S/M, L-XL.

KNEE PAD PINWOOD® FLEXY 1506

Flexible and lightweight. Available in Anthracite (403). One Size.

ANORAK PINWOOD® MOSQUITO COVER 9280

Light and airy anorak in gnat safe material that also keeps the mosquitoes away. The hood opens with a zipper and can be folded away. Can be packaged in its own front pocket and takes up minimal space in the pack. Available in Olive (107). Sizes: S/M, L/XL, XXL/3XL.

PINEWOOD® SAFETY VEST 9220

Highvisual orange vest with reflectors for extra safety. Prepared with holes for radio antenna on both sides. 100% polyester. Available in Highvisual Orange (502). One size

PINEWOOD® HEAT PAD EN/SV 9201

Warming and reusable. Hold it in your hand or place it in your pocket specifically designed for this purpose in our Hunting / Fishing Glove part no. 9109. Bend the metal disc and a natural chemical reaction starts, emitting a maximum 50°C for about 30-45 minutes. Reactivate through boiling. Contains environmentally friendly saline solution (sodium acetate, NaAc). Size: 9 cm x 6 cm.

Bigger sizes, jackets from 4XL and trousers from C66 and D128.

Measurements in size chart may differ ± 1 cm. We reserve the right to make style changes without notice and will not be responsible for misprints.

WATERPROOF

Waterproof product with taped seams.

WATER-REPELLENT

Product with good water repellent properties.

WINDPROOF

Garments with this symbol are made so that they are windproof.

BREATHABLE

Garments with this symbol have high breathability.

DURABLE

Product which is reinforced to be extra durable.

EXTRA WARM

Product that keeps you warm.

4-WAY STRETCH

Functional fabric with stretch both horizontally and vertically for maximum comfort and pliability.

ANTI-ODOUR

The product is produced in an anti-bacterial material.

SILENT

Products that are very silent for a better hunting experience.

REVERSIBLE

Reversible product with two possible color options.

ANTI-MOSQUITO

Garments with this symbol protects against mosquito bites. The product is made from a fabric which is so tightly woven that the mosquito cannot bite through.

XL COLLECTION

A range of products in bigger sizes. Jackets from 4XL, trousers from C66 and D128.

ECO-FRIENDLY

An environmentally friendly product.

UV-PROTECTION

Garments with this symbol have extra protection against the sun's damaging UVA and UVB rays.

ECO-FRIENDLY TREATMENT

Bionic-Finish® Eco. An environmentally friendly and fluorine (PFC) free water- and dirt repellent treatment for sports and outdoor textiles. Due to the hyper branched and hydrophobic polymers water drops will just roll off the fabric keeping the fabric dry and lightweight.

TC-1200

Our own hard-wearing fabric that we use as the outer-layer in jackets, pants, vests and caps. The tightly woven fabric gives good windproof qualities and at the same time the impregnation makes the fabric water-resistant. Quick-drying and easy to manage. Easy to re-impregnate with spray. UV-protection. Manufactured in 65% polyester and 35% cotton.

TC-Lite

A fabric with many excellent characteristics. The TC-lite has been specially developed to ensure a maximum high breathability and comfort in warm weather. The fabric is fastdrying and does not crease easily. The combination of tightly woven 65% polyester and 35% cotton gives a durable and wind-resistant product. The TC-Lite fabric is treated for extra waterrepellency.

TC-Stretch

A fabric which is extremely comfortable to wear as it has a built in stretchable function. The TC-Stretch has been specially developed to ensure a maximum high breathability and comfort in warm weather as well as to through its elastic characteristics give better fit and comfort. The fabric is quick-drying and does not crease easily. The combination of tightly woven 64% Polyester, 34% Cotton, 2% Elastane gives a durable and wind resistant product. The TC-Stretch fabric is treated for extra water repellency and also gives a UV 50+ protection. The fabric can also easily be re-impregnated.

FANTASTIC OUTDOOR CLOTHING! ENJOY YOUR DAYS OUTDOORS!

The Pinewood® Insect-Stop technology revolutionises the way in protecting outdoor clothing against insects. The technology creates a long-lasting and effective shield/atmosphere around the textile fibres which causes most insects to avoid landing on the fabric, an added value to the already high functional outdoor garments in the collection. The active repellent substance IR3535® has during more than 30 years been used in insect repellent sprays and lotions, only now with new advanced technology, it finally can with long-lasting effect be integrated into textiles!

- Outdoor clothing suitable for warm climate conditions where quality, high level function and focus on the outdoor adventure is of utmost importance
- High level clothing protection against most species mosquitoes, ticks, flies and other insects
- UV-protection
- 2 or 4-way stretch fabrics for extra comfort and fit
